

## Intelligent, connected, future-ready: ebblo presents cutting-edge ITCS solutions at IT-TRANS 2026

Neuhausen am Rheinfall, Switzerland – 16 February 2026

With the launch of ebblo, a brand emerging from Trapeze, on 16 February 2026, the company begins a new chapter. At IT-TRANS 2026, taking place from 3 to 5 March in Karlsruhe, ebblo will present itself to an international audience for the first time – positioning itself as a driving force and innovation leader for the public mobility of tomorrow.

Together with its Modaxo sister companies Nexfeld and Systemtechnik, ebblo will be exhibiting at Stand H5 in Hall 1. As a Platinum Sponsor of IT-TRANS, the company underscores its ambition to actively shape the future of public transport – regionally and globally.

### **New ITCS generation: smarter, more connected, future-proof**

At the heart of ebblo's exhibition presence is the new generation of Intermodal Transport Control Systems (ITCS). These solutions combine state-of-the-art vehicle technology with innovative technologies such as AI, V2X, cloud-based architectures and powerful analytical tools. They enable transport operators to optimise operations, manage disruptions efficiently and provide passengers with a reliable, comfortable mobility experience.

### **Accessible mobility: ebblo Assist sets new standards**

A particular highlight is ebblo Assist, an assistance system that enables passengers with reduced mobility to use public transport independently. With advanced vehicle technology and a cloud-based backend, ebblo Assist sets new standards and supports transport operators in providing truly inclusive and barrier-free mobility services.

### **Integrated vehicle technology, business intelligence and e-mobility**

ebblo also presents developments in the areas of on-board systems, business intelligence and e-mobility: The latest on-board computer generation ensures seamless connectivity between vehicles and the control centre and offers a modern, intuitive user experience. In the field of V2X technology, the focus is on the transition from traditional traffic light preemption to bidirectional signal phase assistants – an innovation that improves traffic flow and significantly reduces traction energy consumption. Practical business intelligence tools provide

valuable insights into operational data, while the integrated e-mobility solution visualises charging levels, ranges and vehicle availability in real time, enabling efficient planning of electric fleets.

### **Presentations in the Market Update Forums**

ebblo will contribute two presentations to the IT-TRANS programme:

- **Inclusive Travel: Empowering Visually and Mobility-Impaired Passengers to use Public Transport Independently**  
Tuesday, 3 March, 11:30–11:50, Forum B, Hall 2  
Speaker: Christoph Wehrli, Senior Business Development Manager, ebblo Western Europe
- **Delivering digitally resilient ITCS solutions with future-forward technologies**  
Tuesday, 3 March, 14:30–14:50, Forum A, Hall 1  
Speaker: Sumedha Tatke, Head of Product Marketing, ebblo International

### **Evening event „Mobility Vibes“**

As host of the evening event “Mobility Vibes”, ebblo invites exhibition and congress attendees to the action hall at Messe Karlsruhe on 3 March 2026. The event offers an informal setting for networking and exchange.

Further information about IT-TRANS can be found on the website [www.it-trans.org](http://www.it-trans.org).

### **About ebblo**

ebblo helps public transport providers move confidently into the future. Our advanced Intelligent Transport Control Systems (ITCS) adapt as mobility evolves – powered by future-proof technologies and decades of expertise. We deliver robust, best-in-class solutions, scalable platforms and next generation architectures – ensuring flexibility, control, and security. Our solutions streamline operations, improve accuracy, and enable cleaner, faster, and more accessible and barrier-free networks – making public transport the natural choice for everyone. With proven reliability and transformative innovation, ebblo is your trusted partner for what’s next.

PRESS RELEASE

ebblo is part of Modaxo, the global collective of people transportation technology companies within Constellation Software Inc. (TSX: CSU).
